made seamless.

BALANCE OF SYSTEM SOLUTIONS (BOSS)

RACKING

Optimize your entire PV system with Suniva's BOSS. System integrators can experience best-in-class racking solutions with PanelClaw.

Suniva, an American manufacturer of high-efficiency, high-quality crystalline silicon solar cells and modules, leads the global market with its innovative and low-cost manufacturing techniques. As an extension of our high-quality PV products, Suniva is bringing together industry-leading balance of system partners to make your balance of system solutions seamless.

PANDA BEAR · POLAR BEAR · GRIZZLY BEAR

PANELCLAW PRODUCTS:

PanelClaw, a leading supplier of flat roof and ground mount systems, delivers mounting and balance-of-system solutions to accelerate the adoption of photovoltaics worldwide. Every PanelClaw system is backed by a state-of-the-art testing and certification program and engineered to deliver superior design flexibility and ease of installation. All PanelClaw products deliver the lowest life-cycle project costs.

PanelClaw products are UL 2703 listed and offer integrated UL recognized electric bonding and grounding.

GROUND MOUNT OPTIONS

Panda Bear

- Non-penetrating, ballasted mounting solution for ground applications
- Streamlined design features just three major components plus two nut and bolt sizes
- Available in 10, 20, and 30 degree tilt angles
- Significant factory pre-assembly and design innovations turn construction projects into simple installations
- Suitable in areas with basic wind speeds of up to 120 mph

ROOF MOUNT OPTIONS

Polar Bear Gen II & Grizzly Bear Gen II

- Variable, ballasted systems ideal for flat roof applications with the option of integrated ballast (Grizzly Bear) or flexible ballast (Polar Bear)
- Streamlined design features just three major components plus two nut and bolt sizes
- Available in 5 and 10 degree tilt angles
- Single module design flexibility, and multiple inter-row spacing options
- Suitable in areas with basic wind speeds of up to 100 mph (Grizzly Bear), or 120 mph (Polar Bear)
