

Balance of system solutions  
made seamless.

## BALANCE OF SYSTEM SOLUTIONS (BOSS)

### RACKING

Optimize your entire PV system with Suniva's BOSS. System integrators can experience best-in-class racking solutions with Schletter.

Suniva, an American manufacturer of high-efficiency, high-quality crystalline silicon solar cells and modules, leads the global market with its innovative and low-cost manufacturing techniques. As an extension of our high-quality PV products, Suniva is bringing together industry-leading balance of system partners to make your balance of system solutions seamless.

## GROUND MOUNT · PITCH ROOF MOUNT · FLAT ROOF MOUNT

### SCHLETTER PRODUCTS:

With a long history of manufacturing experience, Schletter has provided innovative solar mounting solutions for residential, commercial, and utility-scale solar installations.

Whether the project is a standard design or custom solution, each system is geared to be highly cost-effective, regardless of the system size.

From roof mount, to ground mount and solar carports, Schletter can manufacture a quality solar mounting structure to meet the most exacting standards.

### GROUND MOUNT OPTIONS

- **FS System**  
Pile driven posts; fast installation time; high level of pre-assembled parts. An ETL Certified system to UL Subject 2703!
- **PvMax**  
Concrete ballast blocks best for sites where soil is too soft or too rocky for stable penetrations; brown fields. Excellent for small and medium-sized PV applications.
- **Park@Sol**  
New innovations to the fabrication process now allow for greater spans in the single and double parking and shade structures.

### PITCH ROOF MOUNT OPTIONS

- **Standard Flush Mount**  
Most economical and versatile system for nearly any roof application.
- **GridNorm Flush Mount**  
Consisting of horizontal rails that connect to the roof structure with vertical cross rails to mount modules.

### FLAT ROOF MOUNT OPTIONS

- **AluGrid**  
New system for flat roof applications; quick installation; maximizes roof load.
- **Windsafe System**  
Flexible design allowing for ballast or penetrating applications and choice of module inclination from 5 to 45 degrees; contains wind deflector on every system.
